

OB3

OCEANBROWSER.COM

Give your students a richer experience with **OceanBrowser3**, the only web application designed for graduate and professional education.

OB3 is for teachers and students dealing with complex material and busy lives.

Why OB3?

Get your course online easily. Save you and your students' time. Let your students use the full value of your content.

Our Customers

University of Otago: Dunedin School of Medicine, Christchurch School of Medicine and Wellington School of Medicine

University of Sydney: Save Sight Institute

"We are delighted with the level of service and commitment provided by the company."

Associate Professor Gordon Sanderson,
University of Otago

Features

- Work in your browser – documents and content are published directly to your website.
- Content and collaboration happen together – post a forum comment anywhere, not just on the forum page.
- Advanced content types such as animation are fully supported – and are fully interactive.
- Usability for busy people is hardwired in – there are many features designed to save precious minutes.
- No special skills or training – tasks such as drag and drop are familiar and intuitive.

www.oceanbrowser.com

1. Bring course content and collaboration together – your users can comment on any resource.

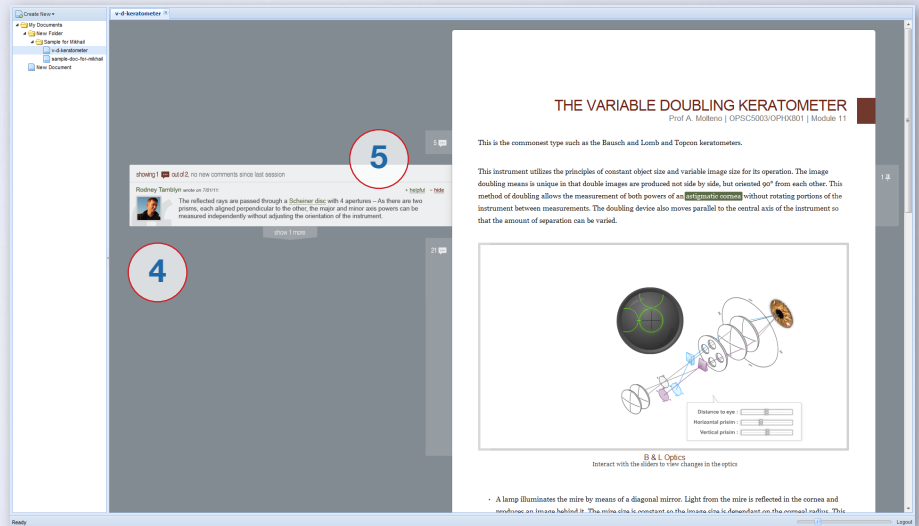

2. Access multiple documents using tabbed interface.

3. Incorporate rich media with ease.

4. Discussions are displayed within document. Users can post a message (with resource attachments)

5. Rate usefulness of a posting for future study reference. OB3 keeps track of which discussions you are following or have previously viewed.

6. Access files & folders. Drag resources from your desktop to add.

7. Edit text in the page, your changes are saved while you work.
